## SAFETY NOTE

**Product:** Harness Calliplox and Calliplox Reverse.

**Problem:** Rescue Lines possibly may hook on zipper puller inside of the rescue compartment.

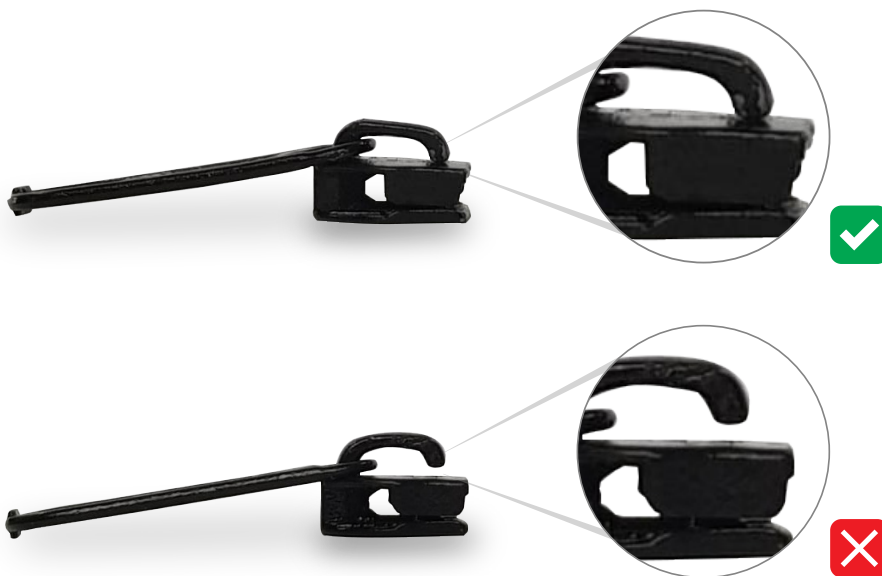

**Procedure:** All harnesses SOL Paragliders Calliplox and Calliplox Reverse have to be checked before next flight.

- Open the rescue compartment.

- Check if the zipper pull offers risk to hook the line or cause malfunction of the rescue use

**1) If it is OK:** following the normal rescue installing.

**2) if it is not OK :** You must use pliers to tighten the zipper puller:

**3)** Take the pliers and carefully try to tighten nicely to not damage the zíper.

**4)** Another inspection is necessary until you install your rescue inside of the compartment.

This procedure is enough to solve the problem.  
However if you still have any questions,  
**please contact us:**
